VIEW

The on-site
and on hand electronic documentation tool

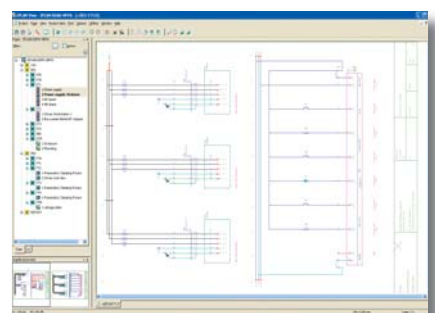

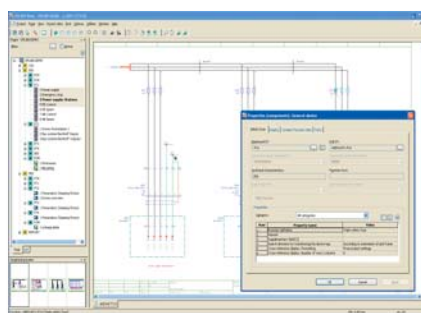

EPLAN View is the ultimate cost-effective software to locate, read and print EPLAN Electric P8, EPLAN Fluid and EPLAN PPE project documentation with maximum ease and speed.

Quick access to latest project data

During the engineering process, there is always a need to monitor project status or search for project data. EPLAN View amply fulfils this need for all concerned disciplines, be it electrical, fluid power or instrumentation and control, by allowing anyone to view up-to-date project information quickly, simply and safely.

Easy navigation

Imagine thumbing through endless pages every time you need to look up an important project information. Can you even be certain that those are the latest prints? The hunt doesn't get much easier, even with an electronic image file. This is where the optimal solution from EPLAN comes into play. With its native navigation and search functions, EPLAN View will save you valuable time and frustration when every minute counts during start-up or service right on the plant floor. By accessing the actual project, you will be able to drill down to detailed project data such as device information that is not necessarily on paper. How's that for convenience?

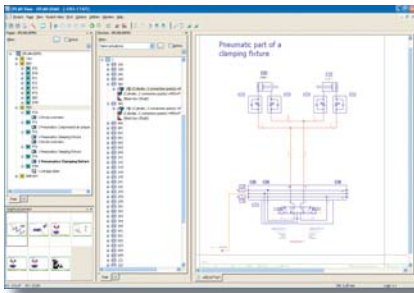

OVERVIEW of highlights

Having open-access means more control for project managers and ability to perform repair and maintenance tasks more efficiently for service engineers.

Common EPLAN View features

EPLAN View gives users read-only access to native EPLAN Electric P8, EPLAN Fluid and EPLAN PPE projects. And, since EPLAN View is part of the revolutionary EPLAN Platform just like these products, performing allowed tasks will be a snap with its familiar interface identical to the full versions.

- Full viewing access of native EPLAN Electric P8, EPLAN Fluid and EPLAN PPE projects via the common EPLAN Platform user interface
- Goto counterpart (jump) function
- Signal tracking and potential tracking
- Access to the Device Navigator
- Access to the Bill of Materials Navigator
- Effortlessly share projects with anyone using the Send by email feature
- Filter for specific set of pages based on properties such as modification date
- Print all, changed, or any desired pages in B&W or color
- Print attached files such as specification sheets
- Export into DWG or common image files
- View with Zoom and Pan functions
- View detailed properties of all project elements
- Search and find text
- Context Help
- Easy installation
- Runs on the same operating systems as the full versions
- And much more
